YOUR SOLUTION

UBS e-Credit Controller is a valuable service that provides critical information before making important business decisions.

It provides detailed information on companies, businesses and individuals in terms of bankruptcies, litigation cases, winding-up petitions and defaulter's payment information. It also captures the number of credit enquiries made on the subject over the years. The report includes the subject's shareholding and directorship in companies and businesses.

With all these information available, you can make informed decisions on extending credit, business partnerships and employment.

- ◆ Business Intelligence by Company Report (BIC)
- ◆ Business Intelligence by Business Report (BIB)
- ◆ Business Intelligence by Individual (BII)
- ◆ Business Monitoring Services
